

MLF Bacteria

Direct Inoculation "Rip & Tip"

2022 Pricelist & Tech Sheet

PRICELIST (excluding GST)

BACTERIA			
PRODUCT	APPLICATION	PACK SIZE	PRICE UNIT
LACTOENOS® B7 DIRECT	<i>Oenococcus oeni</i> for direct inoculation to all wines with a tolerance to low pH and high alcohol.	2.5 hL	\$24.50
		25 hL	\$120.00
		250 hL	\$760.00
LACTOENOS® SB3 DIRECT	<i>Oenococcus oeni</i> for direct inoculation to all wines.	25 hL	\$110.00
		250 hL	\$740.00
MLF NUTRIENT			
PRODUCT	APPLICATION	PACK SIZE	PRICE KG
MALOBOOST®	Nutrient for MLF bacteria which facilitates the onset and restart of MLF.	1 kg	\$54.00

BACTERIA APPLICATIONS

OBJECTIVE	INOCULATION TYPE	STAGE	RECOMMENDED LACTOENOS® PREPARATION
Save time by a faster completion of MLF. Optimise the management of the fermentation processes. Reduce volatile acidity.	Early co-inoculation	24-48 hours after the start of alcoholic fermentation.	LACTOENOS® SB3 DIRECT
Maximise the control of the ecosystem. Safeguard the conventional vinification sequence (AF followed by MLF).	Late co-inoculation	At 0-4° Brix.	LACTOENOS® SB3 DIRECT LACTOENOS® B7 DIRECT
Red wine MLF post pressing. MLF in barrel. Reduce the potential of SO ₂ to combine with wine compounds.	Sequential inoculation	At dryness and post pressing.	LACTOENOS® SB3 DIRECT LACTOENOS® B7 DIRECT
Restart stuck MLF. Spring MLF.	Curative inoculation	To restart a stuck MLF.	LACTOENOS® B7 DIRECT

BACTERIA SPECIFICATIONS

PRODUCT	ALCOHOL	pH	TOTAL SO ₂	TEMPERATURE
LACTOENOS® B7 DIRECT	≤ 16% vol	≥3.2	≤ 60 mg/L	≥15°C
LACTOENOS® SB3 DIRECT	≤ 15% vol	≥3.3	≤ 40 mg/L	≥15°C
